

Quick Reference Changelog

Jon Hurst

27th November 2025

Version 1.8

- Wake turbulence: changed A380 to "Super".
- Autopilot: Included FLS and SLS
- Miscellaneous: Added no rolling takeoff on Narrow Runway or with RWY/OBS Perf limit.
- Miscellaneous: Added phraseology for removal of "T-frost".
- RNAV approach: Removed note that RNP(AR) approaches are not yet authorised.
- RNAV approach: Added new requirement to correct DA even if above the temperature promulgated on the chart if temperature is less than -10°.
- SLS approach: Removed notes that LPV minima and FMS fallback are not yet authorised.
- ILS approach: Adjusted for new Cat III terminology, removed LTS Cat I.
